PARK MODEL

COMMERCIAL BUNGEE TRAMPOLINE

Permanent commercial attraction

CERTIFIED BY TÜV SÜD
EN 13814

**BUILT FOR PARKS.
BUILT TO PERFORM.**

EURO  JUMPER

STRUCTURAL RESERVE. BUILT INTO THE FRAME.

EUROJUMPER 4in1 Park is engineered as a permanent commercial structure — not a recreational frame scaled up. High-strength aluminium tubes, reinforced critical points and stability-focused geometry create a rigid system designed for repeated daily loads in professional venues.

1. HIGH-STRENGTH ALUMINIUM TUBES

Premium aluminium profiles selected for strength, corrosion resistance and long-term outdoor operation.

2. REINFORCED CRITICAL POINTS

Additional internal reinforcement sleeves and steel support logic in high-load areas for maximum durability.

3. STABILITY-FOCUSED GEOMETRY

Frame geometry engineered to minimise unwanted movement and increase structural confidence during operation.

4. COMMERCIAL LOAD RESERVE

Built with material reserve in key load-bearing areas for repeated daily use in high-traffic venues.

MORE RIGIDITY. LESS FLEX. LONGER COMMERCIAL LIFE.

THE ULTIMATE PARK ATTRACTION.

Designed for performance. Built for business.

The 4in1 Eurojumper Park Model is a high-capacity attraction that combines thrilling fun with outstanding reliability and commercial efficiency. Perfect for amusement parks, resorts, and large entertainment venues.
